
Emerson Park is part of Romford

[REDACTED]
To: information@boundarycommissionengland.gov.uk

1 August 2021 at 18:41

Sir,

I would like to put on record my view that Emerson Park is, and has always been, a part of the Romford Community.

I hope that any boundary changes will help to represent the good people of the local community and ensure that the Member of Parliament, who is incredibly hard working by all accounts, is able to make Emerson Park even better.

Kind regards,

[REDACTED]

Romford boundary change

Sir

I write to give my support to the proposed boundary change for the Romford constituency . This seem to be an eminently sensible development with clear benefits for local democracy.

Yours faithfully

To whom it may concern,

Having lived in Romford in the past, in the RM3 postcode area - I fully support the inclusion of Emerson Park into the Romford Constituency.

I believe there are two main benefits:

- 1) The businesses in that area have more ties to Romford than they do Hornchurch and Upminster.
- 2) This would balance the population appropriately without the need for drastic change.

Prior to boundary changes being suggested, I was pleased to lobby for this. The boundary commissions suggestion I am confident will be supported across the Romford area.

Kind regards,

Sir/madam,

As a local resident of Romford town, I and my family wellcome your noble idea of bringing the Emerson and Romford constituency into one as both has been under same MP banner until 2010.

It will foster the old ties and strong community cohission that has once existed between the two community including other surrounding communities like hornchurch and upminster as all are part of wider Havering community.

Sir/madam, There are more other benefits for the locals in areas of transport and road network links which all of them share in common.

It is a long expected step in the right direction as all of them share a geographical expression in their location.

The boundary commission's proposal for me is one of the best solution that has a wide acceptance and support from all the local affected community as perceived from the public opinion.

Looking forward to its full implementation at your earliest convenience.

The community ties between Emerson Park and Romford are very strong and I agree that you have made the right decision in adopting this plan. Emerson Park has strong community ties with Ardleigh Green, Gidea Park, Heath Park and Romford and would fit naturally into the same Constituency as these neighbourhoods.

The 3 towns of Romford, Hornchurch and Upminster are all part of the Havering community.

Regards

Boundary Commission for England

35 Great Smith Street
London
SW1P 3BQ

To Whom It May Concern,

I am writing today regarding the boundary changes that have been suggested by the Boundary Commission in the London Borough of Havering. My specific focus is on my support for the change that will move the Emerson Park Ward into the Romford Constituency. Having worked in the area for quite some time now I am glad to see these changes having been suggested by the Boundary Commission.

I believe this is the correct decision, as the Hornchurch and Upminster Constituencies must be made smaller to rebalance the constituencies. Given that much of the current Emerson Park ward used to be part of the Romford Constituency, it would appear sensible that this is the part that changes hands again in this rebalancing. The fact that it was as recent as 2010 that this area of Emerson Park was part of Romford, I believe also makes the changes sensible. Unlike other areas that may be moved from Hornchurch and Upminster, this area already has connections from recent history to the area that it would move into meaning that the change would be more seamless.

The strong community ties that exist between Emerson Park, Ardleigh Green and Gidea Park make it a perfect area to be moved into the Romford constituency. Emerson Park is a significant part of a continuous residential area that runs from the furthest part of Emerson Park to East Romford. It, therefore, makes sense to bring these areas back together into one constituency. This point was in part recognized in the changes to the ward boundaries in the area, with part of Emerson Park ward being transferred into Romfords Squirrels Heath ward. Surely, the logic that applied to that change is also relevant in the matter of the constituency boundary.

Furthermore, this community shares important transport links into Romford, with busses that run from Emerson Park, through Ardleigh Green and Gidea Park and into Romford. Romford is also only one stop from Emerson Park on a train that runs between the two regularly through the day.

This train line and the River Ingrebourne create a clear geographical boundary between the Romford and Hornchurch and Upminster Constituencies. This is important as it ensures that the constituency has one continuous community without the situation where two different people living on the same road are represented by a different M.P.

Best Wishes,

Romford Boundary Changes

Dear Boundary Commission for England

I have lived in Rush Green for all 54 years of my life. My family have been here for generations.

I would like to say that I think the community spirit is valued immensely.

Gidea Park, Collier Row and Emerson Park are a wider part of our Romford Community. We would like these attached to our Romford Constituency with our MP, Andrew Rosindell.

Myself and my friends from this community are all very pleased that you have decided to do this and hope this is finalised in due course.

Yours faithfully

2 August 2021 at 20:14

Dear Boundary Commission

I would like to register my support for the Boundary Commission for England's initial proposals for the Romford constituency.

The combination of Wards and Polling Districts as outlined in the plan will strengthen community ties across the wider Romford area.

It will bring Emerson Park back to Romford, where much of it was before until 2010.

The proposals will also make sure that Squirrels Heath Ward is not divided into two constituencies under the new ward boundaries, which include parts of EM2 and EM4.

It is clear that Emerson Park faces towards Romford, with transport links being the obvious example, one stop on the train from Emerson Park to Romford and direct road links.

The area shares, schools, churches, community centres, sports facilities, shopping areas, voluntary organisations with Romford and especially Ardleigh Green and Gidea Park.

I am also pleased to see that the proposals bring equality to both the Romford and Hornchurch & Upminster constituencies, with 76,323 voters for Romford and 76,806 voters for Hornchurch and Upminster. This seems a good balance.

It is logical that Emerson Park is placed in the same constituency as Gidea Park, Ardleigh Green, Heath Park and Romford, as they are one continuous neighbourhood.

The proposed boundary also makes good geographical sense, the natural boundary being the railway line to the south and the River Ingrebourne to the east and north.

Emerson Park is also in the same parish of All Saints Squirrels Heath and shares the same RM11 postcode, so has much in common with the Romford constituency and the surrounding district.

The Boundary Commission for England have made a good judgement over this matter and I hope they will now make this a definite decision in time for the next General Election.

We need one M.P. representing our whole community and this change make that happen.

Thank you for your consideration.

Yours truly,

The ward of Emerson park being absorbed into the constituency of Romford

1 message

2 August 2021 at 20:16

To: "information@boundarycommissionengland.gov.uk" <information@boundarycommissionengland.gov.uk>

Dear Boundary Commission ,

I am writing to you about the question on the Ward of Emerson Park as a part of the Constituency of Romford or Hornchurch. I feel that historically and economically Emerson Park has been closer to Romford then Hornchurch such as the once large agricultural industry of Havering which lead Emerson to having a closer historical and economical ties revolving around the trade market of Romford.

As well geographical there is a clearly definable geographical boundary, between the Hornchurch & Upminster constituency and Emerson Park. This being the River Ingrebourne to the east and north and the Romford to Emerson Park railway line to the south. This makes Emerson Park a natural fit with the residential areas mentioned above that are all part of the Romford constituency and with which there is no geographical divide.

Finally not only for these reasons, but as well we have seen Romford has always been outnumbered by the voters of Hornchurch so it's only right that Romford have the same amount of voters as Hornchurch in order to make elections more fare for each constituency.

Therefore, I believe as a resident of Romford and a previous resident of Hornchurch that the question of Emerson Park should belong to the constituency of Romford.

Sincerely,

Urgent

Boundary Commission for England
35 Great Smith Street
London
SW1P 3BQ
Telephone: 020 7276 1102

Ref: Emerson Park ward, 2023 review
Constituency: Hornchurch and Upminster (London)

To whom it may concern,

I would like to write to the Boundary Commission for England regarding the 2023 review, to oppose the move to place Emerson Park ward into Romford constituency. The ward which is currently in Hornchurch and Upminster constituency would not fit into the Romford Constituency and, it has historic and cultural links to Hornchurch and Upminster, such as our local football team, Hornchurch business network, and shared common greenspaces, cultural centres such as our Queens theatre and Hornchurch Library.

I also think that the commission should acknowledge that Emerson Park is served by several key public transport links, and road links (such as Wingletye Lane, Butts Green Road and the A127) connecting to Hornchurch and Upminster, not Romford.

I strongly oppose this move and would request that this be changed, and that Emerson Park ward remains in Hornchurch and Upminster constituency. Attached below are our contact details signing and dating this letter of concern to you, asking for action on this matter.

I hope this letter of opposition to the move from the commission of Emerson Park to Romford is taken into account when the commission draws up the new proposals.
